ACKNOWLEDGEMENTS

This report is an outcome of a cooperative endeavor of the University of Missouri (MU) and the Food Bank for Central and Northeast Missouri (FBCNM). At MU, the authors greatly benefited from the support of individuals and programs in four Colleges—Agriculture, Food and Natural Resources; Arts & Sciences; Human Environmental Sciences; and the Harry S Truman School of Public Affairs. The nine individuals who conducted the interviewing on this project—Patricia Brinckwirth, Jordan Dawdy, Sara Harrier, Elly Lang, Ashley Price, Grace Rathert, Lauren Sines, Ashley Vancil, and Brenna Webster—worked tirelessly and with great success. Finally, we would like to thank the sponsors of this research, including the United States Department of Agriculture (Agriculture and Food Research Initiative; Human Nutrition and Obesity Program), and the Division of Applied Social Sciences (College of Agriculture, Food, and Natural Resources).

The constant support and participation of people connected with the FBCNM and pantries in its service region have been critical to this effort. At the FBCNM, Peggy Kirkpatrick contributed to every phase, providing guidance based on her long history of serving the area. Mikki Moody greatly eased the survey work by coordinating the research with the area's food pantries, and Anthony Evans was instrumental in assisting with the planning and conduct of the work throughout the region. At the food pantries, we benefited from the efforts of the many pantry directors and volunteers who were extremely helpful with onsite logistics.

Finally, we want to express our sincere gratitude to the pantry clients who participated in this work. Without their participation, this project would not have been possible.

BACKGROUND

The emergency food system in the United States is a critical component of food security, which the Food Assistance and Nutrition Research Program within the U.S. Department of Agriculture (USDA) defines as “access by all people at all times to enough food for an active, healthy life.” Food insecurity in this country is normally due to insufficient resources for food purchases, and the majority of food insecure households avoid hunger by relying on a narrow range of foods or acquiring food through private and public assistance programs.

Food insecurity has been on rise in Missouri over the last decade. According to the USDA, the percent of the state’s population that is food insecure increased from an average of 8.6 percent during the 1999-2001 period to 16 percent over the years 2009-2011.¹ This increase of nearly 8 percentage points of the population exceeds that reported by any other state over this time period. The same pattern holds true for the percent of households that experience hunger in the form of reduced meal portions, skipped meals and similar reductions. In Missouri, 2.3 percent of the population ten years ago was classified as food insecure with hunger, and over the past three years this figure has nearly tripled to 6.7 percent of households.² One alarming dimension of this trend is that not only are more Missourians concerned about having sufficient food, but a higher percentage of these folks are unable to satisfy household needs through the strategies they are employing to access food.

The costs of food insecurity are economic, social, physical, and psychological. For example, the economic costs of food insecurity among adults include income loss, work absenteeism, greater demand for public benefits and social services, and increased rates of health care and social welfare expenditures. Food insecurity and poverty are clearly correlated and symbiotic—poverty is the best single predictor of food insecurity, and hunger is strongly correlated with lower educational achievement, unemployment, and impaired work performance. Recent studies of children show food insecurity and hunger are significant predictors of chronic illness, low birth weight, lower school performance, and developmental and behavioral problems among children.

Services provided by food banks and food pantries are the cornerstones of the non-profit sector’s response to food insecurity. An estimated 5.1 percent of all U.S. households (6.2 million households) accessed emergency food from a food pantry one or more times in 2012. Food banks are institutions that collect food and a range of diverse resources from individuals, businesses, government agencies and other sources for distribution to the more numerous community-based pantries. Pantries are the point of contact with clients, who receive food from the pantries for off-site preparation and consumption. (This report does not address facilities and programs that prepare meals for on-site

¹ The figures in this section are based on the annual reports on household food security released by the USDA’s Economic Research Service. Based on data collected each December as a part of the Supplemental Census, the most recent report is Alisha Coleman-Jensen, Mark Nord, Margaret Andrews, and Steven Carlson, *Household Food Security in the United States in 2011*, Economic Research Report No. (ERR-141). Washington: Economic Research Service, 2012.

² We recognize that in 2006 the USDA altered its former labels of “food insecure without hunger” and “food insecure with hunger” to, respectively, “low food security” and “very low security.” The change in labels did not reflect any change in the methodology used to characterize individual levels of food security and insecurity. As we believe the older labels are more revealing of circumstances, we retain their use in this report.

consumption, such as emergency kitchens and senior centers.) Missouri is served by six regional food banks, which in 2012 distributed nearly 90 million pounds of food to pantries throughout the state.

The Food Bank for Central and Northeast Missouri (FBCNM), located in Columbia, distributed more than 28 million tons of food in 2012, the second highest regional total in the state, to more than 130 food pantries, emergency kitchens, shelters, daycare and senior centers, and other facilities, including 130 schools, located in 32 counties in the central and northeast regions of the state. Remarkably, the Food Bank's distribution poundage has increased more than 50 percent over the past five years.

The goal of the research documented in this report was to conduct a systematic survey of food pantry clients to assist the FBCNM and other institutions in efforts to continue to provide the best possible services to regional residents. Comprehensive and reliable knowledge of pantry clients and their households is essential to the pragmatics of food assistance, including what changes (if any) need to be made in when, where or how assistance is provided, and what might be done to meet the needs of at-risk and vulnerable constituencies. Data on food pantry users may also point to which groups may be under-utilizing these facilities and the need for new programs to address their needs. Finally, it is evident that while Missourians support the work of food banks and pantries, the scope and depth of food insecurity and hunger often remain unknown and unrecognized in the very communities in which these institutions operate. It is our hope that this survey portrait of clients will not only affirm the important work of the FBCNM and the pantries in its service region, but also raise societal awareness of food insecurity and the need for each of us to contribute what we can to its amelioration.

SURVEY DEVELOPMENT AND IMPLEMENTATION

University of Missouri (MU) researchers developed an initial food pantry client survey in the Spring of 2005.³ We revised that instrument for use in the Summer of 2010⁴ and then again in the Spring of 2013. The final survey (see Appendix 1) includes major sections on food pantry use, food security, food acquisition strategies, physical and mental health, nutrition, and general individual and household demographics. The questions reflect a diversity of sources and goals, including questions identified by the FBCNM as important to its mission. In addition, the survey incorporates the short version of the food security module developed by the USDA and used in many studies, health and nutrition questions from surveys developed by the Center for Disease Control, and additional questions reflective of the research and program needs of MU researchers. The project team pretested a survey draft in April 2013. We prepared only an English language written version of the survey; however, two interviewers fluent in Spanish conducted surveys at pantries with expected Spanish-speaking populations and as necessary conducted the oral interviews in Spanish.

The MU team hired nine students (Patricia Brinckwirth, Jordan Dawdy, Sara Harrier, Elly Lang, Ashley Price, Grace Rathert, Lauren Sines, Ashley Vancil, and Brenna Webster) to work as interviewers. The interviewers each received a day of training on implementing the survey and

⁴ Matt Foulkes, Colleen Heflin, Joan Hermesen, Nikki Raedeke, Sandy Rikoon. *Coping With Hunger: Food Pantry Clients in the Central Missouri Food Bank Region, 2010*. Columbia, MO: Interdisciplinary Center for Food Security, 2011.

completed practice interviews before entering the field. MU researchers monitored interviewer progress through review of completed surveys, occasional joint trips to pantries, and regularly scheduled meetings.

SAMPLING

This study is based on a survey of food pantry clients in the 32-county region of central and northeast Missouri defined by the service area of the Food Bank for Central and Northeast Missouri. The Food Bank delivers food to 90 locations for off-site preparation and consumption, and in addition operates a mobile pantry that makes monthly visits to sites in the region. Before determining target pantries, however, we pared our list by removing any pantry servicing a monthly average of less than 0.75% of the 2012 regional totals of food pantry clients as self-reported by the pantries. This decision removed 52 smaller pantries from our list; these facilities together served only 22% of the average regional client population of close to 81,000 persons. Our final target sample included 38 pantries serving more than 64,000 persons monthly in 2012.

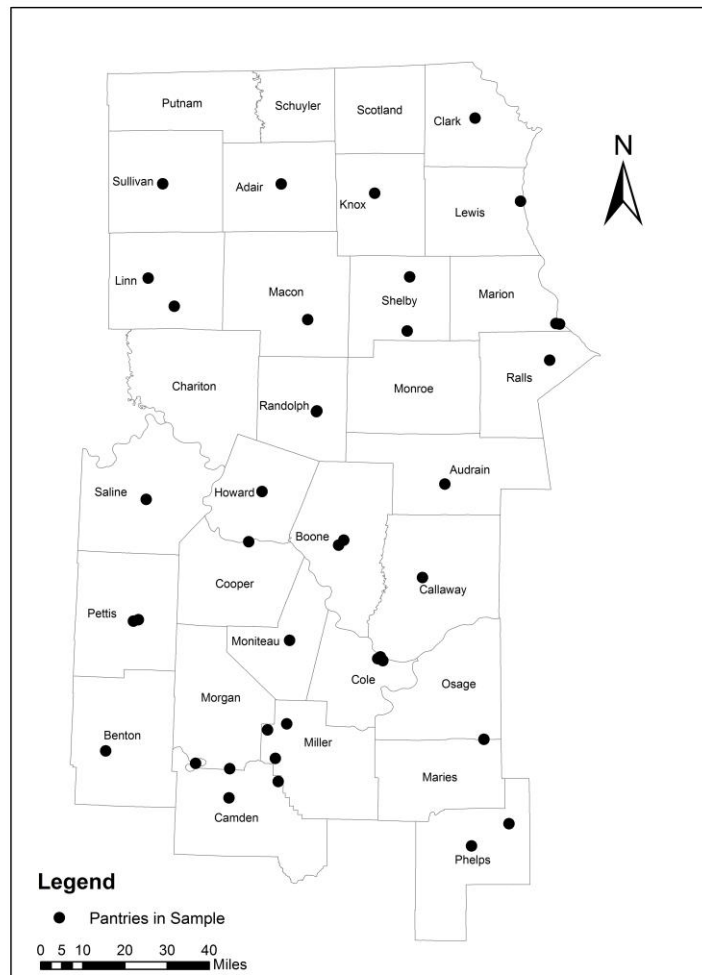

We determined target numbers of interviews at each pantry location by taking its percentage of clients served and multiplying it by our initial target goal of 1,200 surveys. Thus a pantry that served 5% of the region's total would have received a target of 60 surveys (5% of 1,200). We chose a goal of 1,200 to provide a confidence level of 95% and a confidence interval of $\pm 3\%$ across the entire region and to permit more subgroup analyses. These confidence levels and intervals hold for the report of results from the total region, but we caution readers that the subgroup statistics in the report tables have variable, and sometimes lower, confidence levels due to the smaller numbers in reported sub-groups.

Of the 38 pantries eligible for participation, only one refused permission to recruit participants; the non-participating pantry served an average of 1.2% of the remaining sample. The statistics in this report thus include results from 37 pantry facilities that together assisted more than 76% of food pantry clients in the region in 2012 and operated in 25 of the 32 counties serviced by the food bank.

Food pantry clients were interviewed in-person from May 21 to August 5, 2013. We asked interviewers to use a similar protocol at each pantry site. In brief, the protocol called for soliciting participation from every third person coming into, or arriving at, the pantry. To begin work, interviewers would attempt to make an initial contact. If this individual refused or was not appropriate for interviewing (e.g., a case worker picking up food for a family unable to travel to the pantry), the interviewer contacted the next person (and so on) until a client agreed to be interviewed. At the completion of a survey, the interviewer began again with the third person arriving as the next possible participant. The structured interviews typically lasted 20-30 minutes. We approached nearly 1,980 clients for interviews. Of these contacts, 151 potential respondents (7.6%) were not eligible for interviewing, with the two most common reasons being that these were individuals who had already completed a survey or were at the pantry as "proxies" of households unable to visit the pantry.

Of the 1829 appropriate contacts, we had 556 refusals (30.4% refusal rate) and 61 clients (3.3%) began, but did not complete, interviews. The usable rate of 69.6% (N=1273) and the completion rate of 66.3% (N=1212) are very high for survey research projects. A full list of pantries and the specific number completing pantries at each site is included as Appendix 2.

Study Area

Rapid appraisal analysis of age and gender of non-respondents does not suggest any bias in our sample of participants versus all pantry clients. Interviewers listed reasons given for lack of interest in participation and also compiled data on the sex and age of refusals, and whether or not these individuals had arrived at the pantry site with children. In comparing the demographic data of refusals with the information from participants, we do not believe there is any significant bias in the research results based on these characteristics. Male refusals constitute 34% of non-participants, while males comprise about 27% of cooperating individuals. In terms of age, comparisons between percentages of refusals and participants for three general age groups (18-39, 40-59, and 60+) are, respectively, 36, 46, and 18 percent for refusals versus 31, 54, and 14 percent for participants. As for concern that pantry clients with children might be non-participants in greater numbers, 7% of refusals arrived at pantries with children, while nearly one-quarter of all participants are from households with at least one child under the age of 5.

READING THE DATA TABLES

The tables in this report present the descriptive results of the “Missouri Food Pantry Survey.” The data tables are presented largely in order of the sequence of questions on the survey instrument, a sample of which is included as Appendix 1 to this report. The number in the title of each table (e.g., Table “Q1”) refers to the number of the question on the survey form. Table titles with a number followed by another number or letter (e.g., Table Q17A) refer to the specific inquiry within a question that included multiple sub-questions. In this example, Question 17 asked respondents how often they depended on various public programs and other sources to obtain food; Question 17A specifically addresses use of “SNAP/Food Stamps Program.” The title for each table also includes the question itself, or a summary restatement of it.

Data tables are included for almost all questions in the survey. Five survey questions—Questions 15, 16, 17, 18 and 52—are not included in this report as the data (e.g., present county) is not useful without reference to other aspects of an individual return. Questions 15-18 are items used to establish weekly household expenditures of food, and a composite variable of these questions is included in the place of the individual variables. In addition, at the end of the report readers will find tables reporting total number of individuals per household, household food security levels, BMI (body-mass index), households with veterans, monthly household income, and household income as a percentage of poverty level, compiled on the basis of several questions included in the survey. These are described in further detail below.

READING THE TABLES: INDEPENDENT VARIABLES

The first row of each table (Total) presents the overall total response from all surveys. The maximum number of surveys possible for any question is 1,273.

Following the “Total,” the left-hand column of each table contains the independent variables, against which all survey question results are reported. These variables allow the reader to compare the responses of various subpopulations in the region, including those categorized by age, health conditions, household income level, and a number of other characteristics. Nine independent variables are presented for each survey question. Descriptions of these variables and how they were derived are found below.

Age – Respondents’ report of age. For purposes of subgroup analysis, respondents were analyzed in three age categories: 1) “18 thru 39” years of age, including 379 respondents comprising 31.2% of the total; 2) “40 thru 64” years of age, including 661 respondents comprising 54.4% of the total; and, 3) “65 and older,” including 175 respondents comprising 14.4% of the total.

Duration of Pantry Use – These subgroups reflect the amount of regular continuous use that the household is now making of food pantries. The 478 households (38% of the sample) in the “0-12 months of regular use” might be considered “new” clients in that they have been regularly visiting pantries for less than one year. We should note that some of these households may have used pantries in the past, but in terms of their most recent history, they began regular visits within the last 12 months. The 255 households (20.4% of the sample) in the “13-35 months” have been utilizing food pantries on a regular basis for more than one year but less than three years. The remaining group of “36+ months” includes 520 households (41.5% of the sample) who might be considered within a group of “chronic” households that depend on the food pantry as a food source.

Health Characteristics of Respondent – In these subgroups, pantry clients are clustered according to self-reported health conditions. Three categories are linked to reports respondents have received from a doctor, nurse or other health worker about diabetes, high blood pressure, and/or high blood cholesterol. The “Diabetes” group includes 287 individuals (23.7% of respondents) who reported being told by a doctor that they have diabetes. This group does not include individuals self-reported as having pre-diabetes or borderline diabetes, but does include a small percentage of individuals (about 1%) with gestational diabetes. The largest number of people reported “High Blood Pressure” (599 individuals or 49.4% of all individuals who have had their blood pressure checked), while “High Cholesterol” was reported by 430 individuals, or 35.5% of clients who reported a health professional had checked blood cholesterol. Obesity is defined as a Body Mass Index (BMI) of 30 and above, and includes 583 individuals, or 49.1% of respondents who self-reported height and weight. We calculate BMI using a standard formula (http://www.cdc.gov/healthyweight/assessing/bmi/adult_bmi/index.html#Interpreted). Finally, in response to the question “*Are you limited in any way in any activities because of physical, mental, or emotional problems?*” 646 respondents, or 53.3%, answered in the affirmative and are included in the subgroup of “Self-defined limitation.”

Children (< age 18) in the Home – The survey included questions on the number of children and the number of adults in each participating client household. For this variable, we subdivided respondents into three groups: 1) Households including at least one child and no more than one adult, labeled as “Yes (with 1 adult)” in the table, and including 147 households comprising 11.7% of the total; 2) Households including at least one child and more than one adult, labeled as “Yes (with 2 or more adults)” in the table and including 423 households comprising 33.8% of the total; and, 3) Households including no children, labeled as “No children” in the table, and including 682 households and comprising 54.5% of the total.

Household Employment Status – Based on survey responses concerning hours of paid employment on the part of adult household members, respondents were subdivided into three groups: 1) Households with no working adults, labeled as “No working adults,” including 641 households and comprising 52.8% of the total; 2) Households with at least one employed adult, but working less than 35 hours per week and no full-time workers, labeled as “Only Part-time Workers,” including 228 households comprising 18.8% of the total; and, 3) Households with at least one adult working more than 34 hours per week, labeled as “At least One Full-time Worker,” including 345 households and comprising 28.4% of the total.

Household Income Level – Based on survey responses concerning the previous month’s household income from all employment, disability, pensions, child support, TANF, Social Security, unemployment and workman’s compensation) and household size, annual incomes were calculated and compared with the poverty guidelines for 2012 developed by the U.S. Department of Health and Human Services. This federal poverty measure was chosen because it is used to determine financial eligibility for most relevant federal programs (e.g. SNAP/Food Stamps). The three groups listed on each table are as follows: 1) Household incomes at “0-50% of poverty level,” including 389 households and comprising 32.9% of the total; 2) Household incomes at 51-100% of poverty level,” including 486 households comprising 41.1% of the total; and, 3) Household incomes at “101% or more of poverty level”, including 307 households comprising 26% of the total.

Household Food Security Level – This survey included the standard 6-item indicator set for classifying households by food-security-status level developed by the United States Department of

Agriculture (see Gary Bickel et al, *Guide to Measuring Household Food Security, Revised 2000*, Washington: USDA Food and Nutrition Service, 2000). The six items can be found as Tables 7-11A in this report. Following the USDA guidelines, respondents were divided into the following three subgroups: 1) “Food Secure” includes respondents who answered in the affirmative for 0-1 of these six questions, including 297 households comprising 23.3% of the total; 2) “Food insecure, w/out hunger” (includes respondents who answered in the affirmative for 2-4 of these six questions, including 501 households comprising 39.4% of the total, and 3) “food insecure, with hunger” includes respondents who answered in the affirmative for 5-6 of these 6 questions, including 474 households comprising 37.3% of the total.

Other Characteristics – This category includes two special subgroups. The first, “Presence of Veteran in Home,” includes the 215 respondents (17.8 percent) who confirmed that at least one military veteran (of any age) lived in the household. The second subgroup, “Use SNAP as a Food Resource,” acknowledges the 685 (or 55.7% of respondents) who cited the use of SNAP (or Food Stamp) benefits for most or all months of the preceding twelve months.

Region – Respondents were divided into groups based on their residence in one of the five regional districts that the Food Bank uses for administrative and logistic purposes. The following geographic regions are used: 1) “Central” region (26.5% of sample) including Audrain, Boone, Callaway, Monroe and Ralls Counties; 2) “Northwest” region,” (7.4% of sample) including Adair, Linn, Macon, Putnam, Schuyler, and Sullivan counties; 3) “Northeast” region (11.4% of sample), including Clark, Knox, Lewis, Marion, Scotland, and Shelby counties; 4) “Southwest” region (21.7% of sample) including Benton, Chariton, Cooper, Howard, Pettis, Randolph, and Saline counties, and 5) “Southeast” region (33% of sample) including Camden, Cole, Maries, Miller, Moniteau, Morgan, Pettis, and Saline counties.

The seven tables at the end of the report present variables that combine more than a single survey question, and are presented in this report for general information for the reader. Data is given for each of these variables across all subgroups:

“Household Size” shows the total number of adults and children in each household
“Household Food Security Level” shows the food security status of household (as described above)
“Body Mass Index Classification” (as described above)
“Veteran in Household” portrays households with at least one military veteran
“Monthly Household Income” is a composite of all variables related to income
“Household Income Level” is the ratio of income level to poverty threshold (as described above).

Finally, unless otherwise indicated, all of the data returns are given as percentages. Within any specific group or subgroup, and for each question, the total across each row should equal 100 percent (or close to it, due to rounding) of returns for that group and question.

Q1. How often do you visit a food pantry?				
	N	Once a month or more	Once every few months	Hardly ever
Total	1272	69.2%	20.8%	10.0%
Age				
18 thru 39	379	53.8%	30.9%	15.3%
40 thru 64	661	73.4%	18.8%	7.9%
65 and older	174	86.2%	7.5%	6.3%
Duration of Pantry Use				
0-12 Months	477	64.2%	17.8%	18.0%
13-35 Months	255	73.7%	22.7%	3.5%
36 or More Months	520	71.9%	22.5%	5.6%
Health Conditions of Respondent				
Diabetes	286	82.5%	13.6%	3.8%
High Blood Pressure	598	72.9%	20.2%	6.9%
High Cholesterol	420	76.4%	16.2%	7.4%
Self-Identified Limitation	646	74.1%	18.4%	7.4%
Obesity	583	71.4%	21.1%	7.5%
Children (<18) in the Home				
No Children	681	74.0%	15.7%	10.3%

2013 Missouri Food Pantry Survey

Interdisciplinary Center
for Food Security

Date: _____

Interviewer: _____

Food Pantry Name: _____

Food Pantry ID#: _____

Survey ID#: _____

Notes:

INTERVIEWERS: CODE ANSWERS IN BLANKS AT RIGHT, UNLESS ANSWER AREA AT RIGHT IS SHADED

Style Code:

WORDS IN CAPS ARE DIRECTIONS FOR THE INTERVIEWER AND DO NOT NEED TO BE READ DURING THE INTERVIEW

WORDS IN BOLD ARE DIRECTIONS AND QUESTIONS THAT YOU WILL READ OUT LOUD DURING THE INTERVIEW

Words in regular type are usually possible answers to your questions.

Oral Consent: READ OR TELL TO POTENTIAL PARTICIPANTS

Before we begin, I want to tell you what we are doing. My name is _____, and I'm really glad you are willing to visit with me. The Food Bank of Central & Northeast Missouri, which provides some of the food distributed by _____ (local pantry name), wants to improve its programs. By knowing more about the folks who use food pantries, the Food Bank and other groups can provide better services and food to meet your needs.

It will take us about 20 minutes to do this survey. Your participation is totally voluntary and I assure you I will not be asking or writing your name or your street address.

Also, your opinions and your answers will have absolutely no impact at all on your ability to use this pantry or any other program. If there is any question you do not wish to answer, just tell me and we'll move on to the next one.

I am going to leave you with this page (DISTRIBUTE PROJECT HANDOUT) that describes our project and gives the names and numbers of people to call if you have any questions.

Do you have any questions for me? IF "NO", GO TO NEXT QUESTION.
IF "YES," TRY TO ANSWER ALL QUESTIONS, AND WHEN SUBJECT HAS NO MORE QUESTIONS, GO ON TO NEXT QUESTION

Do you agree to participate in this survey? IF "YES," GO TO NEXT QUESTION
IF "NO," TERMINATE SURVEY.

ASK ONLY IF QUESTIONABLE OK, I just need to ask if you are 18 years of age or older?
IF "YES," BEGIN SURVEY
IF "NO," TERMINATE SURVEY

<p>NOTE TO INTERVIEWERS: When entering codes in right-side column, always use: 995= Don't Know; 996= Refused = 996; 997= NA (not asked)</p>	
<p><u>Food Pantry Use</u></p>	
<p>To begin, I'd like to ask a few general questions.</p>	
<p>1. Over the past year, how often you gone to a food pantry—this one and any others. Would you say it is</p> <p>1= Once a month or more frequently</p> <p>2= Once every few months</p> <p>3= Hardly ever</p>	<p>PUSEFRE _____</p>
<p>2. As best as you can remember, for how many months or years have you been a visitor to a food pantry?</p> <p>RECORD RESPONSE AS TOTAL # OF MONTHS</p>	<p>PUTIME _____</p>
<p>3. Of the food consumed in your household in a typical month, would you say the food you get from food pantries (or “the food pantry”) provides</p> <p>1= At least half the food we consume</p> <p>2= Less than half, but more than a quarter</p> <p>3= Around a quarter</p> <p>4= Less than a quarter</p> <p>5= Only a tiny piece of what we consume</p>	<p>PANFD _____</p>
<p>Great, this is really helpful. Okay, some of the next questions ask about your household. By household I mean the people who have regularly lived with you over the last 12 months in your house or apartment or mobile home or wherever you live. This can include family members and unrelated people. A person living alone, or a group of unrelated people sharing a place, such as partners, is also a household. First, I would like you to tell me more about your household.</p>	
<p>4. Including yourself, how many adults 18 years of age or older live in your household?</p>	<p>HLDAD _____</p>
<p>IF MORE THAN 1 → Can you tell me the ages of adults other than yourself?</p>	<p>AD1AGE _____</p> <p>AD2AGE _____</p> <p>AD3AGE _____</p>
<p>5. Now, how many children, 17 years of age or younger, live in your household?</p>	<p>HLDCH _____</p>
<p>4A. IF ANY → How many children are under 5 years of age?</p>	<p>HHCH<5 _____</p>

These next questions are about the food eaten in your household in the last 12 months, since (current month) of last year, and whether you were able to afford the food you need.

6. First, in general which of these statements [can use Card #1] best describes the food eaten in your household in the last twelve months. Would you say you have

1= Enough of the kinds of food we want
2= Enough, but not always the kinds of food we want to eat
3= Sometimes not enough to eat
4= Often not enough to eat

7. The first statement is “The food that (I/we) bought just didn’t last, and (I/we) didn’t have money to get more.” Was that 1=often true, 2=sometimes true, or 3=never true for (you/your household) in the last 12 months? 995= Don’t Know; 996= Refused

IF RESPONSE TO Q7 is 1 OR 2, ASK Q7A
IF RESPONSE TO Q7 is 3, don't know, or refused, GO TO Q8

8. The second statement is this: “(I/we) couldn’t afford to eat balanced meals.” Was that often true, sometimes true, or never true for (you/anyone in your household) in the last 12 months? 1=Often true; 2=Sometimes true; 3=Never true 995=Don’t Know; 996=Refused

9. In the last 12 months, since last (name of current month), did (you/ anyone in your household) ever cut the size of your meals or skip meals because there wasn't enough money for food?

1= Yes → GO TO Q9A
2= No → GO TO Q10
995= DK or 996= Refused → GO TO Q10

<p>9A. How often did this happen? 1=almost every month, 2=some months but not every month, or 3=in only 1 or 2 months?</p>	FSQ3F _____
<p>10. In the last 12 months, did (you/anyone in your household) ever eat less than (you/they) felt (you/they) should because there wasn't enough money to buy food? 1= Yes 2= No 995= Don't Know 996= Refused</p>	FSQU4 _____
<p>11. Finally, in the last 12 months, were you (anyone in your household) ever hungry but didn't eat because you couldn't afford enough food? 1= Yes → GO TO Q11A 2= No → GO TO Q12 995= Don't Know or 996= Refused → GO TO Q12</p>	FSQU5 _____
<p>11A. How often did this happen? 1=almost every month, 2=some months but not every month, or 3=in only 1 or 2 months?</p>	FSQ5F _____
<p>Next are some questions about difficulties people sometimes have in meeting the cost of essential household expenses for things like medical care, mortgage or rent payments, or utility bills.</p>	
<p>12. So, thinking about last 12 months, has there been any time when you could not . . . REPEAT FORMAT (1=yes; 2=no; 995=dk; 996=refused)</p>	
<p>1. In general, pay for all your essential expenses</p>	HARD1 _____
2. Pay the full amount of utility bills on the due date	HARD2 _____
3. Pay the full amount of the rent or mortgage on the due date	HARD3 _____
4. Pay the amount needed for gasoline or other transportation costs	HARD4 _____
<p>13. In the past 12 months was there a time when (you/anyone in your household . . . REPEAT FORMAT (1=yes; 2=no; 995=dk; 996=refusal)</p>	
1. needed to see a dentist but could not afford it and did not go	HARD5 _____
2. needed to see a doctor but could not afford it and did not go	HARD6 _____
3. needed medicine of any kind but could not afford it	HARD7 _____
<p>14. In the past 12 months, have you or anyone in your household ever had to choose between . . . REPEAT FORMAT (1=yes; 2=no; 995=don't know; 996=refusal)</p>	
Buying the food you need and paying for medicine or medical care	COMP1 _____
Buying the food you need and paying for utilities	COMP2 _____
Buying the food you need and paying for rent or mortgage	COMP3 _____
Buying the food you need and paying for gas	COMP4 _____

<p><u><i>Food Sources:</i></u> Okay, now I'd like to talk about getting food for your household.</p>	
<p>15. How much do (you/anyone in your household) ACTUALLY spend at supermarkets and grocery stores in a USUAL WEEK, including any purchases made with food stamp benefits? ENTER DOLLAR AMOUNT</p>	<p>WK\$1 _____</p>
<p>16. How much do (you/your household) spend at stores such as meat markets, produce stands, bakeries, warehouse clubs, and convenience stores in a USUAL WEEK, including any purchases made with food stamp benefits? ENTER DOLLAR AMOUNT</p>	<p>WK\$2 _____</p> <p>[TOTAL OF WK\$1 & WK#2 _____]</p>
<p>17. How much of the (\$Q15+\$Q16) is usually for non-food items, such as pet food, paper products, alcohol, detergents, or cleaning supplies?</p>	<p>NOTFD _____</p>
<p>18. How much do (you/your household) spend for food at restaurants, fast food places, cafeterias, and vending machines in a USUAL WEEK, not including alcohol purchases? ENTER DOLLAR AMOUNT</p>	<p>WK\$#3 _____</p>
<p>19. How many minutes does it take you to travel from where you live to the store where you buy the majority of your food?</p>	<p>TMGRO _____</p>
<p>20. People may use different sources to get the food they need. I'm going to mention a few of these. For each, I'd like you to think about the last year or so, and tell me if you used these sources 1=never at all, 2=only one or two months, 3=some months but not all, or 4=every month. You can use this card [CARD#2] 995= Don't Know; 996= Refused</p>	
<ol style="list-style-type: none"> 1. SNAP/Food Stamps Program 2. Relatives and family living outside your household 3. Friends, neighbors or co-workers 4. Hunting/Fishing 5. Gardens 6. WIC Programs (Women, Infant and Children) 7. School lunch program [free or reduced price] 8. Buddy Pack Program 9. Summer food programs for kids 10. Meals on Wheels or other senior meal program 	<p>FDSRC1 _____</p> <p>FDSRC2 _____</p> <p>FDSRC3 _____</p> <p>FDSRC4 _____</p> <p>FDSRC5 _____</p> <p>FDSRC6 _____</p> <p>FDSRC7 _____</p> <p>FDSRC8 _____</p> <p>FDSRC9 _____</p> <p>FDSRC10 _____</p>
<p><u><i>Nutrition and Health</i></u></p>	
<p>You're being so helpful. Now, I'll change topics. Food pantries want to provide foods that fit your needs, so the next set of questions asks about the foods <u>you</u> eat and your health.</p>	
<p>21. First, about your health . . . would you say that in general your health is 1=excellent, 2=very good, 3=good, 4=fair, or 5=poor?</p>	<p>HRAT _____</p>

22. Now, some question on food. First, in a typical week, how many times do you normally eat <u>fresh or frozen</u> fruits, not counting juice?	FFRUIT _____
23. And in a typical week, how many times do you eat canned fruits, not counting fruit juices?	CFRUIT _____
24. And in a typical week, how many times do you consume <u>fresh</u> or <u>frozen</u> vegetables, again not counting juices?	FVEG _____
25. And how about how many times a week do you eat canned vegetables, not counting juices?	CANVEG _____
26. In a typical week, how many times do you drink milk or use milk on your cereal? IF 0 → QUESTION 27 IF 1 OR MORE TIMES → What type of milk do you typically consume? 1=Whole milk, 2=2%, 3=1%, or 4=Skim/nonfat; 5 = other	MILK_____
	MITYPE_____
27. Again, in a normal week, how many times do you eat dried beans (the kind that you soak in water) or canned beans. Do NOT include green beans. (e.g., soybeans, kidney/red beans, pinto beans, garbanzo beans, lentils, black beans, black-eyed peas, baked beans, refried beans)	BEANS_____
28. In a typical week, on how many days do you do at least 30 minutes of exercise, like brisk walking, bicycling, gardening, etc.?	EXDAYS _____
29. Have you been to see a doctor or nurse for your own health in the last year? 1=Yes 2=No 995=Don't Know 996=Refused	HLVIS _____
